Subject: Re: ACC call on formaldehyde status

Hi David,

I already told ACC this would be a high level meet and greet with Kris on video. We are keeping the meeting out of the general realm of science. I specifically said, "I don't really use these meeting as a venue to review notable science anyway." That's why I did not invite the assessment scientists or management. I need to discipline some of these engagements and make them more productive. Sound ok?

Tina

Tina,

Kimberly Wise called Norm and he spoke with her. She said ACC has a meeting scheduled with you and Kris for the 21st.

Kimberly said ACC wants to talk about new studies and to ask about the status of the assessment.

Norm let her know that the assessment would be in its current development step for a while longer. She said two of the studies will be submitted shortly for publication.
